DEPARTMENT OF FORESTRY
**FORESTRY AND FOREST PRODUCTS
PROGRAM**

PROGRAM

Aim and Objective

Within the scope of the Forestry and Forest Products Program, students are provided with basic science courses, Forestry and Forest Products field courses and vocational elective courses starting from the first grade, and students are provided with more detailed and advanced information on the subjects they are interested in. In addition, practical courses are provided in addition to theoretical classes each semester, and they are provided with the opportunity to learn fieldwork conditions and principles, to be able to use field equipment actively and to reinforce their theoretical knowledge. Besides, it is aimed at raising qualified individuals who are productive, inquisitive, self-confident, sensitive to national and spiritual values, who contribute to the development of the forestry organization, who have sufficient technical education, knowledge and skills, who adapt to changing conditions and who follow technological developments in line with the needs of our country.

INTERNSHIP

Opportunities

Our students can intern in the central and provincial units of the General Directorate of Forestry and the General Directorate of Nature Conservation and National Parks under the Ministry of Agriculture and Forestry, in private forestry offices, and factories producing forest products.

ACQUIRED

Title

Our students who graduate from this program receive the title of "Forestry and Forest Products Technician".

ENTRY

Requirements

Students who succeed in the Higher Education Institutions Examination (YKS) Basic Proficiency Test (TYT) organized by ÖSYM can choose our program.

SOCIAL

Opportunities

Our vocational school has football, basketball, and volleyball courts so our students can effectively use their time outside of class. In addition, traditionally, every year, football, basketball, volleyball and table tennis tournaments are organized in which students can participate as spectators or athletes. In addition to these activities, various courses are organized for our students.

STUDY

Fields

Forestry and Forest Products Technicians;

- Forestry and Forest Products Program graduates can work as technical and administrative staff in centres affiliated with the Ministry of Agriculture and Forestry (General Directorate of Nature Conservation and National Parks, General Directorate of Forestry)
- Provincial organizations and institutions such as the General Directorate of State Hydraulic Works, General Directorate of Highways, State Planning Organization
- In the private sector, they can work as technical staff in private forestry offices, landscape companies, private nurseries
- Other private organizations that carry out forestry-related work and operations.

VERTICAL TRANSFER

Opportunities

Our students who successfully complete the associate degree program can transfer to the following departments if they are successful in the Vertical Transfer Examination (DGS) organized by student selection and placement center (ÖSYM).

- Woodworking Industrial Engineering
- Forest Industry Engineering
- Forestry Engineering
